25X1A

1. The airfield was north of Borisov ($54^{\circ}12'N/28^{\circ}31'E$), Belorussian S.S.R. From flying activity observed source inferred that the field was occupied only by biplanes, three of which were seen aloft at the same time.
2. A parachute jump area was about 5 km northwest of the town perimeter and the PW hospital. Individual parachute jumps from altitudes of about 800 to 1,000 meters were observed there throughout the day when the weather was good. Each plane was occupied by only the pilot and one parachutist. The flying time was about 10 to 15 minutes. The parachute opened immediately. No mass parachuting or cargo gliders were seen. Weapons or equipment were not dropped.
3. PWs who were employed in an armament plant said that the civilians of the plant had to make one duty jump each month.
4. According to Soviet nurses, a parachute division was stationed near the airfield.
